

'I think of a number'

Questions

- 1) I think of a number, double it and then add 10. The answer is 24. What is the number?

- 2) I think of a number, subtract 5 and then multiply it by 3. The answer is 9. What is the number?

- 3) I think of a number, multiply it by 3 and then subtract 4. The answer is 29. What is the number?

- 4) I think of a number, halve it and then add 10. The answer is 13. What is the number?

- 5) I think of a number, add 9 and then divide it by 5. The answer is 4. What is the number?

- 6) I think of a number, subtract 12 and then double it. The answer is 6. What is the number?

- 7) I think of a number, multiply it by 4 and then add 1. The answer is 21. What is the number?

- 8) I think of a number, divide it by 3 and then add 5. The answer is 15. What is the number?

- 9) I think of a number, subtract 9 and then multiply it by 5. The answer is 35. What is the number?

10) I think of a number, add 12 and then divide it by 6. The answer is 3.
What is the number?

11) I think of a number, multiply it by 5 and then halve it. The answer is 20.
What is the number?

12) I think of a number, divide it by 9 and then add 8. The answer is 10.
What is the number?

13) I think of a number, subtract 7 and then double it. The answer is 16.
What is the number?

14) I think of a number, add 4, subtract 5 and then multiply it by 3. The
answer is 27. What is the number?

15) I think of a number, subtract 5, double it and then add 10. The answer
is 20. What is the number?

16) I think of a number, divide it by 3, add 4 and then double it. The answer
is 16. What is the number?

17) I think of a number, double it, add 5 and then divide it by 3. The answer
is 7. What is the number?

Answers

- 1) I think of a number, double it and then add 10. The answer is 24. What is the number?
 $24 - 10 \div 2 = \underline{7}$
- 2) I think of a number, subtract 5 and then multiply it by 3. The answer is 9. What is the number?
 $9 \div 3 + 5 = \underline{8}$
- 3) I think of a number, multiply it by 3 and then subtract 4. The answer is 29. What is the number?
 $29 + 4 \div 3 = \underline{11}$
- 4) I think of a number, halve it and then add 10. The answer is 13. What is the number?
 $13 - 10 \times 2 = \underline{6}$
- 5) I think of a number, add 9 and then divide it by 5. The answer is 4. What is the number?
 $4 \times 5 - 9 = \underline{11}$
- 6) I think of a number, subtract 12 and then double it. The answer is 6. What is the number?
 $6 \div 2 + 12 = \underline{15}$
- 7) I think of a number, multiply it by 4 and then add 1. The answer is 21. What is the number?
 $21 - 1 \div 4 = \underline{5}$
- 8) I think of a number, divide it by 3 and then add 5. The answer is 15. What is the number?
 $15 - 5 \times 3 = \underline{30}$
- 9) I think of a number, subtract 9 and then multiply it by 5. The answer is 35. What is the number?
 $35 \div 5 + 9 = \underline{16}$
- 10) I think of a number, add 12 and then divide it by 6. The answer is 3. What is the number?
 $3 \times 6 - 12 = \underline{6}$
- 11) I think of a number, multiply it by 5 and then halve it. The answer is 20. What is the number?
 $20 \times 2 \div 5 = \underline{8}$
- 12) I think of a number, divide it by 9 and then add 8. The answer is 10. What is the number?
 $10 - 8 \times 9 = \underline{18}$
- 13) I think of a number, subtract 7 and then double it. The answer is 16. What is the number?
 $16 \div 2 + 7 = \underline{15}$
- 14) I think of a number, add 4, subtract 5 and then multiply it by 3. The answer is 27. What is the number?
 $27 \div 3 + 5 - 4 = \underline{10}$
- 15) I think of a number, subtract 5, double it and then add 10. The answer is 20. What is the number?
 $20 - 10 \div 2 + 5 = \underline{10}$
- 16) I think of a number, divide it by 3, add 4 and then double it. The answer is 16. What is the number?
 $16 \div 2 - 4 \times 3 = \underline{12}$
- 17) I think of a number, double it, add 5 and then divide it by 3. The answer is 7. What is the number?
 $7 \times 3 - 5 \div 2 = \underline{8}$

Tips and Techniques

1. Read each question slowly. You may find it helpful to underline the numbers and important information that will affect your answer.

For example: Find 23 more than 57?

2. If you do not understand the question straightaway, try reading it through a couple of times until it makes sense.

3. Make sure you read the question carefully. Often, the words highlighted in bold in the question will be the part you need to pay the most attention to, e.g. *Which country had the **greatest increase** in visitors from 2005 to 2006?*

4. Even if you know the answer to the question without working it out on paper, it is important to always show your working out in the box provided. You will lose marks if you do not do this.

5. Always use a ruler when drawing shapes, symmetry or graphs.

6. Topics that are useful to revise;

* **Time** - 24 hour clock, adding a length of time e.g. 45 minutes to a certain time. An example of a question where time is used is - "*The time is one thirty in the afternoon. Write this as it would be shown on a twenty-four hour clock?*"

* **Money** - find the total amount of shopping items, how much change will you get from a £5, £10 note etc.

* **Number calculations** - times tables, addition, subtraction, multiplication and division methods.

* **Measurement** - how many metres in a kilometre, millilitres in a litre and grams in a kilogram?

* **Percentages and fractions** - $1/2=0.5$ or 50%, $1/4=0.25$ or 25%, $3/4=0.75$ or 75%, $1/3=0.33$ or 33%, $1/5=0.2$ or 20%

7. Check to see how many marks the question is worth. If it is worth more than one mark, make sure you show your working out.

8. Use everyday objects to help your child practice certain topics. For example; a shopping receipt can be good revision for money questions - adding totals and finding change. Other useful objects that you could use are;

* **Television Guide** - Practice the time a programme starts, what time will it finish? how long does the programme last?

* **Weather Chart** - Change in temperature - e.g. *The temperature fell from 3 degrees celsius to -4 degrees celsius. By how many degrees did the temperature fall?*

* **Measure yourself and other family members to practice height** (in cm, metres), weight (in grams, kilograms), area of hands and feet. You could also calculate the average family height, weight etc.
