

MATHS HOMEWORK = HELP

Mixed Calculations

1) $(2 \times 5) + 3 =$

2) $(3 \times 2) + 9 =$

3) $3 \times (2 + 6) =$

4) $(5 \times 4) - 10 =$

5) $4 \times (8 - 3) =$

6) $(16 \div 4) + 2 =$

7) $(25 \div 5) - 3 =$

8) $(8 \times 2) + (3 \times 3) =$

9) $(11 \times 3) - (10 \div 5)$

10) $(10 - 2) \div (2 \times 2) =$

Put brackets in the correct places:-

1) $3 \times 6 + 5 = 23$

2) $4 \times 7 + 4 = 32$

3) $5 \times 6 - 3 = 27$

4) $6 + 2 \times 8 = 22$

5) $7 - 12 \div 3 = 3$

6) $24 \div 6 + 7 = 11$

7) $25 \div 5 + 9 = 14$

8) $72 \div 9 - 2 = 6$

9) $15 - 2 \times 7 = 1$

10) $22 - 44 \div 4 = 11$

- 1) At a football match there are 452 people cheering the home side, and 275 people cheering the opposition. How many people are there in total?

- 2) A can of coke costs 46p. How much would 5 cans of coke cost?

- 3) Alice is 163cm tall. Her younger brother is 38cm shorter than her. How tall is Alice's brother?

- 4) The total cost for 5 children to go to the zoo is £65. How much does it cost for 1 child?

- 5) A watering can can hold up to 1.6 litres of water. A jug can hold up to 0.4 litres of water. How many jugs of water will fill the watering can?

MATHS HOMEWORK = HELP

Answers

1) $(2 \times 5) + 3 = 13$

2) $(3 \times 2) + 9 = 15$

3) $3 \times (2 + 6) = 24$

4) $(5 \times 4) - 10 = 10$

5) $4 \times (8 - 3) = 20$

6) $(16 \div 4) + 2 = 6$

7) $(25 \div 5) - 3 = 2$

8) $(8 \times 2) + (3 \times 3) = 25$

9) $(11 \times 3) - (10 \div 5) = 31$

10) $(10 - 2) \div (2 \times 2) = 2$

Put brackets in the correct places:-

1) $(3 \times 6) + 5 = 23$

2) $(4 \times 7) + 4 = 32$

3) $(5 \times 6) - 3 = 27$

4) $6 + (2 \times 8) = 22$

5) $7 - (12 \div 3) = 3$

6) $(24 \div 6) + 7 = 11$

7) $(25 \div 5) + 9 = 14$

8) $(72 \div 9) - 2 = 6$

9) $15 - (2 \times 7) = 1$

10) $22 - (44 \div 4) = 11$

- 1) At a football match there are 452 people cheering the home side, and 275 people cheering the opposition. How many people are there in total? $452 + 275 = 727$

- 2) A can of coke costs 46p. How much would 5 cans of coke cost? $46p \times 5 = \text{£}2.30$

- 3) Alice is 163cm tall. Her younger brother is 38cm shorter than her. How tall is Alice's brother? $163\text{cm} - 38\text{cm} = 125\text{cm}$

- 4) The total cost for 5 children to go to the zoo is £65. How much does it cost for 1 child? $\text{£}65 \div 5 = \text{£}13$

- 5) A watering can can hold up to 1.6 litres of water. A jug can hold up to 0.4 litres of water. How many jugs of water will fill the watering can? $1.6 \text{ litres} \div 0.4 \text{ litres} = 4 \text{ jugs}$

MATHS HOMEWORK = HELP

Tips and Techniques

1. Read each question slowly. You may find it helpful to underline the numbers and important information that will affect your answer.

For example: Find 23 more than 57?

2. If you do not understand the question straightaway, try reading it through a couple of times until it makes sense.

3. Make sure you read the question carefully. Often, the words highlighted in bold in the question will be the part you need to pay the most attention to, e.g. *Which country had the **greatest increase** in visitors from 2005 to 2006?*

4. Even if you know the answer to the question without working it out on paper, it is important to always show your working out in the box provided. You will lose marks if you do not do this.

5. Always use a ruler when drawing shapes, symmetry or graphs.

6. Topics that are useful to revise;

* **Time** - 24 hour clock, adding a length of time e.g. 45 minutes to a certain time. An example of a question where time is used is - *"The time is one thirty in the afternoon. Write this as it would be shown on a twenty-four hour clock?"*

* **Money** - find the total amount of shopping items, how much change will you get from a £5, £10 note etc.

* **Number calculations** - times tables, addition, subtraction, multiplication and division methods.

* **Measurement** - how many metres in a kilometre, millilitres in a litre and grams in a kilogram?

* **Percentages and fractions** - $1/2=0.5$ or 50%, $1/4=0.25$ or 25%, $3/4=0.75$ or 75%, $1/3=0.33$ or 33%, $1/5=0.2$ or 20%

7. Check to see how many marks the question is worth. If it is worth more than one mark, make sure you show your working out.

8. Use everyday objects to help your child practice certain topics. For example; a shopping receipt can be good revision for money questions - adding totals and finding change. Other useful objects that you could use are;

* **Television Guide** - Practice the time a programme starts, what time will it finish? how long does the programme last?

* **Weather Chart** - Change in temperature - e.g. *The temperature fell from 3 degrees celsius to -4 degrees celsius. By how many degrees did the temperature fall?*

* **Measure yourself and other family members to practice height** (in cm, metres), weight (in grams, kilograms), area of hands and feet. You could also calculate the average family height, weight etc.
