

MATHS HOMEWORK = HELP

# Number 1

1) Here are some numbers

34

52

41

17

65

Write the numbers in order.

Smallest

Largest

2) There are 10 crayons in each box and 4 more crayons.

How many crayons are there altogether?

3) Write the answer

$$25 - 11 =$$

4) Write the two missing numbers in the sequence

5) Write the missing number

One is done for you

6) John buys 4 packets of sweets. There are 12 sweets in a packet. How many sweets does he have altogether?

7) Write the missing digits to make this correct

$$\boxed{\phantom{0}} \boxed{1} + \boxed{2} \boxed{\phantom{0}} = \boxed{4} \boxed{5}$$

8) Write the number which is halfway between these numbers

9) Julie needs 12 marbles. The shop sells marbles in packs of 5.

How many packs does Julie need to buy?

10) There are 50 balloons in a bag.

20 balloons are red.

15 balloons are blue.

The rest are yellow.

How many sweets are yellow?

## Answers

1) Here are some numbers

34

52

41

17

65

Write the numbers in order.

Smallest

Largest

17

34

41

52

65

2) There are 10 crayons in each box and 4 more crayons.

How many crayons are there altogether?

$$(4 \times 10) + 4 = 44 \text{ crayons}$$

3) Write the answer

$$25 - 11 = 14$$

4) Write the two missing numbers in the sequence

5) Write the missing number

One is done for you

6) John buys 4 packets of sweets. There are 12 sweets in a packet. How many sweets does he have altogether?

$$4 \times 12 = 48 \text{ sweets}$$

7) Write the missing digits to make this correct

$$\begin{array}{|c|} \hline 2 \\ \hline \end{array} \begin{array}{|c|} \hline 1 \\ \hline \end{array} + \begin{array}{|c|} \hline 2 \\ \hline \end{array} \begin{array}{|c|} \hline 4 \\ \hline \end{array} = \begin{array}{|c|} \hline 4 \\ \hline \end{array} \begin{array}{|c|} \hline 5 \\ \hline \end{array}$$

8) Write the number which is halfway between these numbers

9) Julie needs 12 marbles. The shop sells marbles in packs of 5.

How many packs does Julie need to buy?

$12 \div 5 = 2 \text{ r } 2$  Therefore Julie needs to buy 3 packs of marbles.

10) There are 50 balloons in a bag.

20 balloons are red.

15 balloons are blue.

The rest are yellow.

How many sweets are yellow?

$50 - 20 - 15 = 15$  yellow sweets

## **Tips and Techniques**

1. Read each question slowly. You may find it helpful to underline the numbers and important information that will affect your answer.

*For example: Find 23 more than 57?*

2. If you do not understand the question straightaway, try reading it through a couple of times until it makes sense.

3. Make sure you read the question carefully. Often, the words highlighted in bold in the question will be the part you need to pay the most attention to, e.g. *Which country had the **greatest increase** in visitors from 2005 to 2006?*

4. Even if you know the answer to the question without working it out on paper, it is important to always show your working out in the box provided. You will lose marks if you do not do this.

5. Always use a ruler when drawing shapes, symmetry or graphs.

6. Topics that are useful to revise;

\* **Time** - 24 hour clock, adding a length of time e.g. 45 minutes to a certain time. An example of a question where time is used is - *"The time is one thirty in the afternoon. Write this as it would be shown on a twenty-four hour clock?"*

\* **Money** - find the total amount of shopping items, how much change will you get from a £5, £10 note etc.

\* **Number calculations** - times tables, addition, subtraction, multiplication and division methods.

\* **Measurement** - how many metres in a kilometre, millilitres in a litre and grams in a kilogram?

\* **Percentages and fractions** -  $1/2=0.5$  or 50%,  $1/4=0.25$  or 25%,  $3/4=0.75$  or 75%,  $1/3=0.33$  or 33%,  $1/5=0.2$  or 20%

7. Check to see how many marks the question is worth. If it is worth more than one mark, make sure you show your working out.

8. Use everyday objects to help your child practice certain topics. For example; a shopping receipt can be good revision for money questions - adding totals and finding change. Other useful objects that you could use are;

\* **Television Guide** - Practice the time a programme starts, what time will it finish? how long does the programme last?

\* **Weather Chart** - Change in temperature - e.g. *The temperature fell from 3 degrees celsius to -4 degrees celsius. By how many degrees did the temperature fall?*

\* **Measure yourself and other family members to practice height** (in cm, metres), weight (in grams, kilograms), area of hands and feet. You could also calculate the average family height, weight etc.
