

MATHS HOMEWORK = HELP

Speed, Distance & Time

$$\text{Speed} = \frac{\text{Distance}}{\text{Time}}$$

Work out the speed if:

1) The distance = 200km and time = 4hr.

Speed =

2) The distance = 150km and time = 2hr.

Speed =

3) The distance = 440km and time = 11hr.

Speed =

4) The distance = 350km and time = 7hr.

Speed =

5) The distance = 300km and time = 1.5hr.

Speed =

6) The distance = 200km and time = 1.25hr.

Speed =

7) The distance = 500km and time = 2hr 30mins.

Speed =

8) The distance = 180km and time = 2hr 15mins.

Speed =

Work out the distance if:

1) The speed = 10km/hr and time = 3hr.

Distance =

2) The speed = 15km/hr and time = 5hr.

Distance =

3) The speed = 22km/hr and time = 8hr.

Distance =

4) The speed = 46km/hr and time = 2hr.

Distance =

5) The speed = 12km/hr and time = 1.5hr.

Distance =

6) The speed = 32km/hr and time = 2.75hr.

Distance =

7) The speed = 50km/hr and time = 1hr 30mins.

Distance =

8) The speed = 96km/hr and time = 2hr 15mins.

Distance =

Work out the time if:

1) The distance = 100km and speed = 25km/hr.

Time =

2) The distance = 250km and speed = 50km/hr.

Time =

3) The distance = 320km and speed = 80km/hr.

Time =

4) The distance = 240km and speed = 12km/hr.

Time =

5) The distance = 9km and speed = 6km/hr.

Time =

6) The distance = 90km and speed = 40km/hr.

Time =

7) The distance = 168km and speed = 48km/hr.

Time =

8) The distance = 165km and speed = 66km/hr.

Time =

MATHS HOMEWORK = HELP

Answers

Work out the speed if:

1) The distance = 200km and time = 4hr.

Speed = 50km/hr

2) The distance = 150km and time = 2hr.

Speed = 75km/hr

3) The distance = 440km and time = 11hr.

Speed = 40km/hr

4) The distance = 350km and time = 7hr.

Speed = 50km/hr

5) The distance = 300km and time = 1.5hr.

Speed = 200km/hr

6) The distance = 200km and time = 1.25hr.

Speed = 160km/hr

7) The distance = 500km and time = 2hr 30mins.

Speed = 200km/hr

8) The distance = 180km and time = 2hr 15mins.

Speed = 80km/hr

Work out the distance if:

1) The speed = 10km/hr and time = 3hr.

Distance = 30km

2) The speed = 15km/hr and time = 5hr.

Distance = 75km

3) The speed = 22km/hr and time = 8hr.

Distance = 176km

4) The speed = 46km/hr and time = 2hr.

Distance = 92km

5) The speed = 12km/hr and time = 1.5hr.

Distance = 18km

6) The speed = 32km/hr and time = 2.75hr.

Distance = 88km

7) The speed = 50km/hr and time = 1hr 30mins.

Distance = 75km

8) The speed = 96km/hr and time = 2hr 15mins.

Distance = 216km

Work out the time if:

1) The distance = 100km and speed = 25km/hr.

Time = 4hr

2) The distance = 250km and speed = 50km/hr.

Time = 5hr

3) The distance = 320km and speed = 80km/hr.

Time = 4hr

4) The distance = 240km and speed = 12km/hr.

Time = 20hr

5) The distance = 9km and speed = 6km/hr.

Time = 1.5hr

6) The distance = 90km and speed = 40km/hr.

Time = 2.25hr

7) The distance = 168km and speed = 48km/hr.

Time = 3.5hr

8) The distance = 165km and speed = 66km/hr.

Time = 2.5hr

Tips and Techniques

1. Read each question slowly. You may find it helpful to underline the numbers and important information that will affect your answer.

For example: Find 23 more than 57?

2. If you do not understand the question straightaway, try reading it through a couple of times until it makes sense.

3. Make sure you read the question carefully. Often, the words highlighted in bold in the question will be the part you need to pay the most attention to, e.g. *Which country had the **greatest increase** in visitors from 2005 to 2006?*

4. Even if you know the answer to the question without working it out on paper, it is important to always show your working out in the box provided. You will lose marks if you do not do this.

5. Always use a ruler when drawing shapes, symmetry or graphs.

6. Topics that are useful to revise;

* **Time** - 24 hour clock, adding a length of time e.g. 45 minutes to a certain time. An example of a question where time is used is - *"The time is one thirty in the afternoon. Write this as it would be shown on a twenty-four hour clock?"*

* **Money** - find the total amount of shopping items, how much change will you get from a £5, £10 note etc.

* **Number calculations** - times tables, addition, subtraction, multiplication and division methods.

* **Measurement** - how many metres in a kilometre, millilitres in a litre and grams in a kilogram?

* **Percentages and fractions** - $1/2=0.5$ or 50%, $1/4=0.25$ or 25%, $3/4=0.75$ or 75%, $1/3=0.33$ or 33%, $1/5=0.2$ or 20%

7. Check to see how many marks the question is worth. If it is worth more than one mark, make sure you show your working out.

8. Use everyday objects to help your child practice certain topics. For example; a shopping receipt can be good revision for money questions - adding totals and finding change. Other useful objects that you could use are;

* **Television Guide** - Practice the time a programme starts, what time will it finish? how long does the programme last?

* **Weather Chart** - Change in temperature - e.g. *The temperature fell from 3 degrees celsius to -4 degrees celsius. By how many degrees did the temperature fall?*

* **Measure yourself and other family members to practice height** (in cm, metres), weight (in grams, kilograms), area of hands and feet. You could also calculate the average family height, weight etc.
