

MATHS HOMEWORK = HELP

## Time 2

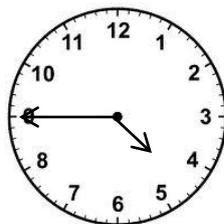

1) My alarm clock shows this time:

07:15

Draw this time on the clock face below.

2) The clock in the school hall shows the time below.

What time does the clock show?

3) Charlotte wants to go shopping in Reading

She takes the train from Bracknell to Reading, leaving at 12:30.

If she arrives in Reading at 12:50, how long did her train journey last?

4) Harry travels from London to Paris by plane.

His flight takes 1 hour.

He leaves London at the time shown on the clock below:

What time does he arrive in Paris?

5) Jake starts his homework at 5.15pm.

His homework takes him 2 hours to complete.

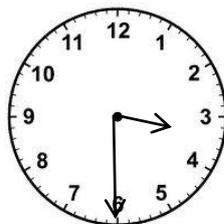

What time does Jake finish his homework?

6) Ella goes to her weekly swimming lesson.

It starts at 4.10pm and lasts for 30 minutes.

What time does Ella's swimming lesson finish?

7) The time on the clock below is 1 hour too slow.

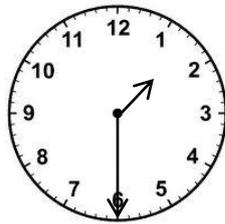

What time should the clock show?

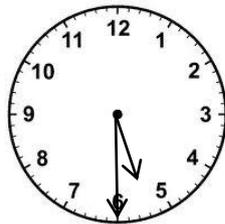

- 8) Barlow the rabbit has an appointment at the vets at 2.20pm.  
He leaves the vets at 2.35pm.  
How long did his appointment last?

- 9) I am visiting my mum 200 miles away.

My journey starts at the time shown on the clock below:

I arrive at my mum's house at

How long did my journey take?

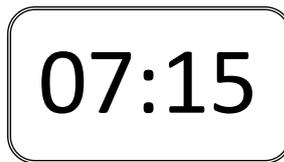

- 10) My friend is having a birthday party.  
The party starts at 7.30pm.  
I arrive 15 minutes late.  
What time do I arrive at the party?

## Answers

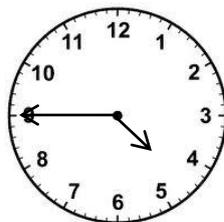

1) My alarm clock shows this time:

Draw this time on the clock face below.

2) The clock in the school hall shows the time below.

What time does the clock show? **04:45**

3) Charlotte wants to go shopping in Reading

She takes the train from Bracknell to Reading, leaving at 12:30.

If she arrives in Reading at 12:50, how long did her train journey last?

**20 minutes**

4) Harry travels from London to Paris by plane.

His flight takes 1 hour.

He leaves London at the time shown on the clock below:

What time does he arrive in Paris?

11:15

5) Jake starts his homework at 5.15pm.

His homework takes him 2 hours to complete.

What time does Jake finish his homework?

7.15pm

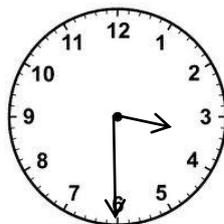

6) Ella goes to her weekly swimming lesson.

It starts at 4.10pm and lasts for 30 minutes.

What time does Ella's swimming lesson finish?

4.40pm

7) The time on the clock below is 1 hour too slow.

What time should the clock show?

04:30

8) Barlow the rabbit has an appointment at the vets at 2.20pm.

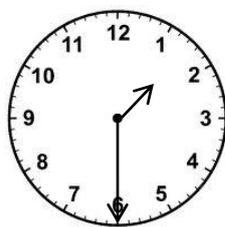

He leaves the vets at 2.35pm.

How long did his appointment last?

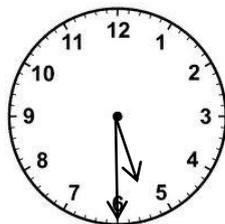

15 minutes

9) I am visiting my mum 200 miles away.

My journey starts at the time shown on the clock below:

I arrive at my mum's house at

How long did my journey take? 4 hours

10) My friend is having a birthday party.

The party starts at 7.30pm.

I arrive 15 minutes late.

What time do I arrive at the party?

7.45pm

MATHS HOMEWORK = HELP

## **Tips and Techniques**

1. Read each question slowly. You may find it helpful to underline the numbers and important information that will affect your answer.

*For example: Find 23 more than 57?*

2. If you do not understand the question straightaway, try reading it through a couple of times until it makes sense.

3. Make sure you read the question carefully. Often, the words highlighted in bold in the question will be the part you need to pay the most attention to, e.g. *Which country had the **greatest increase** in visitors from 2005 to 2006?*

4. Even if you know the answer to the question without working it out on paper, it is important to always show your working out in the box provided. You will lose marks if you do not do this.

5. Always use a ruler when drawing shapes, symmetry or graphs.

6. Topics that are useful to revise;

\* **Time** - 24 hour clock, adding a length of time e.g. 45 minutes to a certain time. An example of a question where time is used is - *"The time is one thirty in the afternoon. Write this as it would be shown on a twenty-four hour clock?"*

\* **Money** - find the total amount of shopping items, how much change will you get from a £5, £10 note etc.

\* **Number calculations** - times tables, addition, subtraction, multiplication and division methods.

\* **Measurement** - how many metres in a kilometre, millilitres in a litre and grams in a kilogram?

\* **Percentages and fractions** -  $1/2=0.5$  or 50%,  $1/4=0.25$  or 25%,  $3/4=0.75$  or 75%,  $1/3=0.33$  or 33%,  $1/5=0.2$  or 20%

7. Check to see how many marks the question is worth. If it is worth more than one mark, make sure you show your working out.

8. Use everyday objects to help your child practice certain topics. For example; a shopping receipt can be good revision for money questions - adding totals and finding change. Other useful objects that you could use are;

\* **Television Guide** - Practice the time a programme starts, what time will it finish? how long does the programme last?

\* **Weather Chart** - Change in temperature - e.g. *The temperature fell from 3 degrees celsius to -4 degrees celsius. By how many degrees did the temperature fall?*

\* **Measure yourself and other family members to practice height** (in cm, metres), weight (in grams, kilograms), area of hands and feet. You could also calculate the average family height, weight etc.
